

departing from the spirit of the invention and the scope of protection is only limited by the scope of the accompanying Claims.

1. A port for use with an article of footwear adapted to engage a foot, the article of footwear having a sole structure, an upper portion connected to the sole structure, and a sensor system connected to the sole structure, the port comprising:

- a housing adapted to be connected to the article of footwear, the housing comprising a chamber adapted to removably receive an electronic module therein; and
- an interface in communication with the sensor system and having a plurality of electrical contacts exposed within the chamber, such that the interface is configured to form an electrical connection with the electronic module such that the electronic module engages the electrical contacts to place the electronic module in communication with the sensor system when the electronic module is received within the chamber.
